Control panel design

CONTROL PANEL DESCRIPTION

- ① Volume level increase button / Next track
- ② Headphones ON/OFF button; Playback / Pause; Phone call acceptance; Call control button
- ③ Volume level decrease button / Previous track
- ④ LED indicator
- ⑤ 3.5mm audio cable connector
- ⑥ Micro USB port for charging
- ⑦ Microphone

CONNECTION AND OPERATION

Attention! Built-in battery must be charged completely prior to the headphones operation. Make sure that headphones are turned off before battery charging

Battery charging

- Connect the headphones connector ⑥ to a USB port of PC or USB charger using USB to micro USB cable (included). During battery charging indicator ④ is red.
- When the device is charged in full, indicator ④ is blue.
- In case of battery charge level is low repeats signal appears and LED indicator blinks.

Headphones switching ON/OFF

- To switch on the headphone press and hold button ②.

Pairing

- To transmit a signal via Bluetooth it is necessary to connect the device with a signal source (see connection diagram in Fig. 2). For this purpose turn on the headphone and not releasing button ② wait for the search mode to be activated – LED indicator ④ indicates blue and red alternate.
- Select the search mode on a signal source (cell phone, tablet, laptop etc.). «GD-880» will be displayed on the devicelist, need to choose it and make connection*.
- When connection is successful, there will be vocal signal. If no device connected, the earphones will be turned off automatically in 10 minutes. To interface devices, the earphones should be turned on again to the search mode**.
- LED indicator on the earphones blinks blue and red during the data exchange with a device connected via Bluetooth.

* You might have to enter "0000" code to connect some models of devices via Bluetooth.

** If the item has been already registered in the device list of a source, then the second search mode activation is not needed. Choose only the item name and the "connect" command on the source.
